

I can use CASE statement to group my date as year 2014,year 2015 and year 2016. 1/1/2014 to 31/12/2014 then Year 2014 , 1/1/2015 to 31/12/2015 then Year 2015 and 1/1/2016 to 9/9/2016 then Year 2016

I can you NULLIF function to prevent division by zero returning NULL Instead of 0,to get accurate revenue ,avg unit price and gross profit

I can use sales and cost of sales to get my Gross profit

I can you NULLIF function to prevent division by zero returning NULL instead of 0,numeric /  
NULLIF(quantity sold,0) AS unit\_price,
